The grant opportunity provides funding to support medical research and medical innovation projects through the establishment of the BioMedTech Incubator.

The BioMedTech Incubator is intended to:

- provide opportunities for leveraging Australia's research strengths, capabilities and successes to support the commercialisation and translation of new drugs, devices and digital technologies into practice
- facilitate an environment that brings together the funding, time, and expertise necessary for commercialising and translating research, thereby allowing research projects to be 'incubated'
- help Australian innovations move through the research and development pipeline, minimising the patchy and stop/start nature of investment that promising Australian treatments and devices need to commercialise, helping bridge the 'valleys of death' and disruptions in the pipeline
- support and incentivise the pulling in of private capital and industry 'know how' to catalyse the investment and development of emerging biomedtech ventures and a nationally important industry sector.

You should read the [grant opportunity guidelines](#) and [sample grant agreements](#) before filling out this application. We recommend you keep the guidelines open as you are completing your application so you can refer to them when providing your responses.
